## WORK EXPERIENCE

### Laravel Web Developer

#### Invictus Solutions

Optimized large databases through efficient queries, indexing, and structured schema design to improve performance and scalability. Handled data migrations for stable system growth.

Jul 2025 - Present

#### Accomplishments / Tasks

- Loyalty and Referral Systems + API's
- Warehouse Management System + API's

### Laravel Web Developer

#### The Sots

Experienced in managing subdomain-based multisite architectures for scalable and high-performance systems. Strong in building and integrating APIs for seamless system communication. Worked on multi-language applications for global user support and used Livewire to develop dynamic, interactive features with minimal JavaScript.

Feb 2023 - Jun 2025

#### Accomplishments / Tasks

- eShops | eCommerce Solution + API's
- Sunny Breeze Tracking System + API's

### Laravel Web Developer

#### CSoft Systems

Skilled in database management using Eloquent relationships for advanced queries across single and multiple databases. Experienced in debugging and resolving code issues, and enhancing UI interactivity using jQuery and Ajax.

Jul 2022 - Feb 2023

#### Accomplishments / Tasks

- Career Institute | CMS + Dynamic Website

### Laravel Web Developer (Intern)

#### RankSol

Strong in MVC architecture and Eloquent relationships, with experience in responsive design and Laravel package integration to improve functionality and performance.

Apr 2022 - Jul 2022

## EDUCATION

### Full Stack Web Development

#### Career Institute

2021

Completed a Full Stack Web Development course focused on building responsive interfaces using HTML, CSS, Bootstrap, JavaScript, and jQuery. Developed dynamic web applications using PHP and MySQL, gaining hands-on experience in end-to-end full-stack development.

## SKILLS

PHP Laravel Livewire DBMS REST API

Bootstrap JavaScript & jQuery Git

AI-Assisted Development Problem Solving & Debugging

## PROJECTS

### Career Institute

#### Full Stack Laravel Developer

Developed a full-featured Laravel-based Institute Management System from scratch, including campus, student, HR, course, lead, and expense management. Implemented dynamic reporting (daily, weekly, monthly, and custom) to support financial tracking and data-driven decisions.

### Mansooba-e-Amal

#### Full Stack Laravel Developer

Led development of APIs for a government project in Khyber Pakhtunkhwa, enabling VC/NC-based user categorization and structured access control. Built features for need assessments, tracking submissions, and enabling community participation through voting and comments.

### Sunny Breeze Tracking

#### Full Stack Laravel Developer

Built a multi-language system for seamless translation across admin panel and application content. Developed an employee tracking system to monitor working hours, breaks, and offline activity in real time. Implemented location-based task controls ensuring tasks operate only within geofenced sites, along with a live admin dashboard for real-time employee tracking on map.

#### Tasks

- Web + API's

### Loyalty and Referral

#### Full Stack Laravel Developer

Built a Loyalty & Referral Management System using Laravel 12 and Blade with separate admin and user panels. Implemented a modular architecture using Repository Pattern, Service classes, and queued jobs for scalable and efficient operations, covering user management, referrals, bonus points, and product codes.

#### Tasks

- Web + API's
